Summary

Hello world! I am a junior data engineer with experience in Python and Scala, eager to tackle problems with data-driven solutions. I have expertise in building scalable data pipelines, performing data transformation, aggregation, and setting up databases. My background in web scraping, along with my passion for turning raw data into meaningful insights, enables me to help teams make smarter, data-informed decisions.

Professional Experience

Junior Data Engineer, Softserve	04/2024 – present remote
<ul style="list-style-type: none">• Develop and maintain scalable ETL pipelines to process large datasets, optimizing data flow and performance.• Collaborate with cross-functional teams to design and implement new data solutions, improving data availability and reliability.• Debug and resolve issues in the existing codebase, improving data processing efficiency and reliability.	
Python Developer, A Data Pro	11/2022 – 04/2024 remote
<ul style="list-style-type: none">• Developed and maintained web scraping scripts using Python libraries like Scrapy and Selenium, automating data extraction from diverse sources including websites, APIs, and documents.• Performed data transformation, validation, and loading within project pipelines, ensuring accuracy and consistency in the processed data.• Implemented techniques to bypass web scraping blockers.	

Tech Skills

Programming Python, Scala, JavaScript, HTML/CSS	Frameworks Scrapy, Selenium, Pandas, Numpy, Flask
Databases PostgreSQL, SQLite, DynamoDB	Tools Spark, Airflow, AWS, Docker, Git, Linux

Education

Medicine, Trakia university Degree Not Finished	2014 – 2022 Stara Zagora
High school diploma, Romain Rolland Foreign Language High School Courses: English as a main language	2014 Stara Zagora
