Hello world! I am a self taught Python developer who's eager to tackle problems with data-driven solutions. I've got the skills for web scraping, data transformation, aggregation, and setting up databases. I love diving into data, turning it into something meaningful, and finding valuable insights that help people make smart decisions.

🧰 Professional Experience

Python Developer, A Data Pro

11/2022 – present
remote

- Extract and ingest data from diverse sources, including websites, APIs, and documents with the use of web crawling tools such as Scrapy and Selenium.
- Conduct data transformation, validation, and loading operations through project pipelines, ensuring data accuracy and consistency.
- Integrate data storage solutions, including database implementation, optimizing data accessibility, retrieval, and analysis.
- Debug and resolve issues within existing codebase, enhancing data processing efficiency and reliability.

🧩 Tech Skills

Programming

Python, JavaScript, HTML/CSS

Frameworks

Scrapy, Selenium, Pandas, Numpy, Flask

Databases

PostgreSQL, SQLite, DynamoDB

Tools

Airflow, AWS, Git, Linux

🎓 Education

Medicine, Trakia university

Degree Not Finished

2014 – 2022

Stara Zagora

High school diploma, Romain Rolland Foreign Language High School

Courses: English as a main language

2014

Stara Zagora

🧠 Soft Skills

- Self Motivated
- Critical Thinking
- Problem Solving
- Teamwork and Collaboration
- Attention to detail
- Interpersonal Communication

🌐 Languages

- Bulgarian (native)
- English (proficient)
