🪪 Summary

Hello world! I am a Big Data Engineer with experience in Python, Scala and Spark. Always eager to tackle problems with data-driven solutions. I have expertise in building scalable data pipelines, performing data transformation, aggregation, and setting up databases. My previous background in web scraping, along with my passion for turning raw data into meaningful insights, enables me to help teams make smarter, data-informed decisions.

💼 Work Experience

Big Data Engineer, *Softserve*　　　　　　　　　　　　　　　　　　04/2024 – present
remote
- **Develop and maintain scalable ETL pipelines** to process large datasets, optimizing data flow and performance.
- **Collaborate with cross-functional teams** to design and implement new data solutions, improving data quality, availability and reliability.
- **Debug and resolve issues** in the existing codebase, improving data processing efficiency and reliability.

Python Developer, *A Data Pro*　　　　　　　　　　　　　　　　　　11/2022 – 04/2024
remote
- **Developed and maintained web scraping scripts** using Python libraries like Scrapy and Selenium, automating data extraction from diverse sources including websites, APIs, and documents.
- **Performed data transformation, validation, and loading** within project pipelines, ensuring accuracy and consistency in the processed data.
- **Implemented techniques to bypass web scraping blockers.**

</> Tech Skills

Programming
Python, Scala, JavaScript, HTML/CSS

Frameworks
Scrapy, Selenium, Pandas, Numpy, Flask

Databases
PostgreSQL, SQLite, DynamoDB

Tools
Spark, Airflow, AWS, Docker, Git, Linux

🎓 Education

Medicine, *Trakia university*　　　　　　　　　　　　　　　　　　　2014 – 2022
Degree Not Finished　　　　　　　　　　　　　　　　　　　　　　　Stara Zagora

High school diploma, *Romain Rolland Foreign Language High School*　　　　2014
Courses: English as a main language　　　　　　　　　　　　　　　Stara Zagora

🌐 Languages

- Bulgarian (native)
- English (proficient)
